

Roger, the third ear to complement your lifestyle

Roger is an intelligent wireless technology that transmits speech directly to hearing aids and cochlear implants. Functioning like a third ear, Roger allows people with hearing loss to learn, work and socialise more easily – a big step towards more inclusive societies and greater personal well-being.

Improved speech understanding in group conversations in noise with Roger*¹

Roger empowers you to communicate effectively in any work environment, enabling you to always be your most productive and creative self. It also makes sure you don't miss life's beautiful moments, allowing you to follow conversations, stay close to friends and family and enjoy an active social life.

* compared to hearing aids alone.

life is on

Since 1947, Phonak is dedicated to preserving social, emotional and physical life quality by opening new acoustic worlds. We believe that well-hearing equates to well-being and thus is essential for living life to the fullest. Today we offer the broadest portfolio of innovative hearing solutions. And, together with our hearing care professionals, we keep on focusing on what matters most: improving speech understanding, changing people's lives and having a positive effect on society as a whole.
